COMPARE!

Because of high prices for such ingredients as Timothy, Redtop, and Kentucky Bluegrass, and sharply increased prices for Common Ryegrass, there will be few low priced mixtures on the market this coming FALL. Such mixtures as will be offered at relatively high prices will be practically all Common Ryegrass with small amounts of Meadow Fescue (so-called English Bluegrass), Timothy, and high inert matter. Common Ryegrass and Meadow Fescue with but 250,000 seeds per pound will not assure adequate ground coverage. Even inexpensive mixtures must have Redtop (4,100,000 seeds per pound), Timothy (1,100,000 seeds per pound) and Kentucky Bluegrass (2,400,000 seeds per pound). ISLAND GREEN will be blended to meet the above analysis and will contain not less than 830,000 seeds per pound of mixture.

We are more than certain that competition can not offer a mixture of similar quality at this price.

Stocks are limited and we would urge you anticipate your FALL needs.
